

THE Nephrotic Syndrome FOUNDATION

SUPPORT. EDUCATE. FIGHT.

The Nephrotic Syndrome Foundation is a non-profit organization supporting those diagnosed with Nephrotic Syndrome, their families, and the ongoing search for a cure.

Background: Nephrotic Syndrome is a serious and rare auto-immune disease that attacks the kidneys causing them to shut down. There is no known cause or cure. Treatments are extremely limited and consist primarily of steroids, cancer, and transplant medications. Many patients are children who spend a major part of their life in and out of the hospital, trying to find a treatment that keeps them in remission while managing the side effects. Receiving this diagnosis is life-changing. It can take the breath out of any parent or child who finds themselves in this situation. Our goal at NSF is to meet each family and child in these tough times and lift each one up by providing financial and emotional support to help them whether the times to better health, acceptance and adjustment.
